

You have got to be kidding me, you are trying to lessen the restriction on the NO Call List. I bet you, in one day, at my own person home, I received 27 calls from companies. It is nuts. My husband and I can't even sit down to dinner without the phone ringing 5 time from some company. Something needs to be done and done NOW!!! Protect the public not the companies. Who cares if these companies go out of business, all they do is disrupt peoples lives, and I am tired of it.
